Tension

It is essential to work to the stated tension in order to achieve your desired fabric, blanket and cushion size. You should always start by knitting a tension square before knitting the full blanket and cushion.

If you have fewer stitches than stated you will need to go down needle sizes until the correct tension is achieved.

If you have more, you will need to go up needle sizes.

Please check individual patterns for tension before starting.

Sewing Notes

When sewing up longer seams in Retreat, use short lengths of yarn to prevent the sewing thread weakening. Due to the soft fibres of the yarn, twist the sewing thread every few stitches to keep the strength. If you prefer, you can use a colour match from any left over yarn of a similar shade.

Finishing

We recommend using mattress stitch for seaming your items. Once complete, it is essential to block your knitting. Pin your items out to the size stated in the pattern. Cover with a damp cloth and leave to dry.

Due to the thickness of Retreat Super Chunky, we have allowed one stitch for making up in the measurements given.

It is essential to work to the stated tension to ensure success.

Pattern Notes

To change the colour in a stripe pattern, break off the colour you are using at the end of the row, then start the next row using the next colour and leave a short tail that will be woven in. If you have small stripes (2 rows) you can carry the colour up the side edge without breaking the yarn.

You will be working in garter stitch, which is every row knit.

Garter stitch is the same on both sides. You can identify the **WS** of your work when working in stripe pattern.

The **WS** is where you can see the colour change pips along the rows when you change colour.
